THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U. S. C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

The following is a preliminary answer to specific information requested on the subject.

1. Considering all available information on multi-engine jet bombers in the USSR, it is doubted that such aircraft are already stationed in Hungary.
2. Even though four- and six-engine jet bombers were first observed as experimental prototypes in Zhukovski during 1949, no Soviet aircraft plant which manufactures them has been reported.
3. Reports published in the press allege that a four-engine jet bomber has been designed by Ilyushin. However, the existence of such a type has not been confirmed, nor is there any indication that an experimental series of such bombers is being built.

This document is hereby regraded to
